CPE Reporting Deadline Looms for Accounting Professionals

New CPEasy Catalog Features Hundreds of CPE Courses That Deliver Timely and Relevant Information on Today's Must-Know Topics

TAMPA, Fla., November 4, 2009 – With the December 31 CPE deadline fast approaching, accountants nationwide face a twofold challenge: finding timely and relevant continuing education courses to meet their state board requirements, and earning those CPE credits with minimal disruption to their pressing work responsibilities. Bisk Education's CPEasy product line offers an ideal solution, with hundreds of [CPE courses](#) covering the critical issues today's CPAs need to know. Topics include the latest rules and regulations pertaining to foreclosures, bankruptcy, ARA benefits, stock losses, tax issues and credits, and more.

"As a CPA myself, I understand just how difficult it can be to find time for continuing professional education – necessary though it may be – given the equally important demands of one's job, clients or organization," noted Nathan M. Bisk, Founder and Chairman of Bisk Education. "In fact, that challenge was the inspiration behind my company. I wanted to make it easy for accountants to get the information they need to successfully fulfill their work responsibilities, while earning the CPE credits they need to maintain their certification. CPE should enhance job performance, not distract from it. With CPEasy, you don't have to worry about where to find useful, high-quality CPE courses and how to get them completed and reported on time. We provide the latest news and expert analysis all in one place, making it easy to conquer even the most complex topics."

All [CPEasy programs](#) are NASBA- and QAS-approved, and offer anywhere between 1 and 40 credit hours per course. Suitable for both individuals and firms, CPEasy courses are available online as well as via CD-ROM software, textbooks, audio CDs, video DVDs, and expert-led webcasts with live interactive question-and-answer sessions. Course topics include [taxation](#), [accounting and auditing](#), ethics, consulting services, management and specialized knowledge.
